Do you want to study Theoretical Chemistry in Europe?

We offer you

• To learn the state of the art methods in Quantum Chemistry
• Perform simulations in different areas
  • Biochemical systems
  • Nanotechnology and New Materials
  • Reaction Dynamics
  • Molecular structure and spectroscopy
• A research project in one of the 8 countries involved
• Mobility in a consortium of 47 top European Universities
• Grants through the Erasmus Mundus program

Directed to students having a Bachelor in Chemistry, Physics or Material Sciences

Program structure: 120 ECTS / 2 years

FIRST YEAR:
Courses in one of the 8 European countries:
Belgium, France, Italy, Netherlands, Poland, Portugal, Spain, Sweden

SECOND YEAR:
Intensive International Course (September)
Research in one of the 47 European Institutions involved

Coordinating Institution: Universidad Autónoma de Madrid
Departamento de Química. 28049 Madrid (Spain)
