MASTER'S DEGREE IN RESEARCH AND NURSING CARE FOR VULNERABLE POPULATIONS

60 ECTS
Academic Year 2020-21

Attending program
1 Full-time Year
(it can be done in two years)

KNOWLEDGE AND SKILLS

- To analyse the theoretical models to approach the study of the phenomenon of vulnerability and social exclusion.
- To analyse critically the scientific evidence available to provide nursing care to individuals, groups and/or vulnerable people, and in social exclusion.
- To design interventions based on scientific evidence to care of individuals, groups and/or vulnerable people, and in social exclusion.
- To add the gender perspective and the racial and ethnic perspective in the analysis of needed assistance of individuals, groups and/or vulnerable people, and in social exclusion.
- To develop and to strengthen current research lines in the field of nursing care to study the individuals, groups and/or vulnerable people, and in social exclusion.
- To analyse the strategies considered in the different levels of health planning for looking after people with vulnerable conditions and in social exclusion, and to discuss proposals for improvement.
- To analyse the chronic and dependency manifestations in current society.
- To identify the needed care of dependant people and people with chronic diseases and their caregivers.

CURRICULUM

Module I: Research Methods

Background, significance and delimitation of research problem (4 ECTS)

Study designs and data analysis in quantitative research (6 ECTS)

Methods and techniques in qualitative research (5 ECTS)

Analysis of qualitative data (3 ECTS)

Module II: Theoretical Models

Nursing care models (6 ECTS)

Module V: Master Research Project (15 ECTS)

CURRICULUM

Module III: Advanced Nursing Care

Women Care (3 ECTS)

Children Care (3 ECTS)

Chronicity and Dependence (6 ECTS)

Migration phenomenon and Social exclusion (3 ECTS)

Module IV: Optional (6 ECTS)

- Health Care System Evaluation. Spanish Health System Approach (3 ECTS).
- Neuropsychological disorders from nursing perspective (3 ECTS).
- Comprehensive approach to pain in vulnerable populations (3 ECTS).
- Social & Health needs of people with different capabilities (3 ECTS).
- Dissemination, Communication and Exploitation of research for impact on practice (3 ECTS).
