

## Recommended Profile

The recommended profile for entry to this Master's Degree is a graduate in Physics or Materials Sciences (for both specialities), in Biology, Biochemistry or Biotechnology (for the speciality of Biophysics). Moreover, as this is a Master's Degree that represents an introduction to research, it is recommendable that have a good capacity for work, an interest in pluridisciplinary studies, a critical spirit, personal initiative, creativity and a capacity for argumentation and communication.
