1. INTRODUCTION

2. COSMOISM AND SPACE EXPLORATION

3. THE SPACE ERA
   3.1. Initial period: from the beginnings to the conclusion of lunar programmes
   3.2. Second period: from the crisis in the sixties to the end of the cold war
   3.3. Third period: the last decade

4. FIELDS OF EXPLORATION
   4.1. The Earth viewed from Space
   4.2. The solar system
       4.2.1. The International Space Station
       4.2.2. The search for artificial intelligence: the SETI Programme

5. ECONOMIC AND SOCIAL BENEFITS OF SPACE EXPLORATION
   5.1. Transfer of space technology
   5.2. The study of other planets and its contribution
   5.3. Space systems for prediction, alert and mitigating action in the case of a disaster

6. REGULATION OF SPACE EXPLORATION AND DIRECTIVE PROPOSALS
   6.1. Initial proposals
   6.2. The most pressing problems
       6.2.1. Space waste
       6.2.2. Orbital saturation

7. BIBLIOGRAPHY
